Open Government Partnership Challenge Theme Brainstorm

Anti-corruption

Q1: What innovative practices can state and federal governments implement to increase transparency and reduce corruption?

Make use of with new ideas

> If no one cares how do you

> > prevent

corruption?

the states?

Q2: How can civil society organizations contribute to monitoring and preventing

Report back

corruption in government projects?

Q1: How can state and federal

governments collaborate to

promote greater public

participation in decision-making

processes?

more community

Civic Space

Q2: How can local governments ensure that civic space remains open and accessible to all citizens?

Model &

Public Service

Delivery

Q1: What role can technology play in improving public service delivery at both the state and federal levels?

CVCTYOTIC

Implement training & requirements to adhere to recommendations. Provide online, free training to governments in the US to learn best practice design skills, so information is simpler, easier to access, and intuitive.

> Funding should be available for governments (local, state, fed) who are seeking to improve access to marginalized communities.

Making the documentation of tools and software open source

Q2: How can governments ensure that public services are

inclusive and accessible to marginalized communities?

> Create requirements for and app delivery

> > adoption to make participation easier in open records, open meetings, etc.

service & training

Digital Governance

Q1: State and local government agencies contend that they often don't have the staff or funding to adequately deal with public records requests. Besides funding what pros and cons do you see in setting up a statewide digital portal, accessible to the public, that all governments within the state could use to automatically upload many of the documents produced in daily government business?

A planned decentralized server or public website could be useful.

Q2: What should be done with records such as emails, texts and chat programs such as Microsoft Teams, that may need some redaction in the limited cases where the law protects certain information from being publicly distributed?

Open Government

Q1: What are the most effective ways to promote a culture of openness and transparency within local/state government

Strong and active

institutions?

Provide access

Share once, Share

Q2: How can data, and what types of data sets specifically, can be used to improve government accountability and decision-making?
